OMOGBOLAHAN I. BAKARE

Senior Full Stack Developer (Next.js • Node.js • Supabase)
Lagos, Nigeria | contact@bakareomogbolahan.com | https://bakareomogbolahan.com/
LinkedIn: linkedin.com/in/omogbolahan-bakare | GitHub: https://github.com/king-bami

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 5+ years of experience building scalable, production-grade web applications for startups, enterprises, and global teams. Strong expertise in Next.js, Node.js, Supabase, and TypeScript, with a proven track record delivering secure SaaS platforms, automation systems, and data-driven products. Experienced in leading projects end-to-end, from architecture and development to deployment and optimization.

CORE SKILLS

Frontend: Next.js, React, Redux, TailwindCSS, Framer Motion, Material UI
Backend: Node.js, Express, Supabase, REST APIs, GraphQL
Databases: PostgreSQL, MongoDB, Firebase
AI & Automation: Hugging Face, Geo APIs, Telegram Bots
DevOps: Git, GitHub, Docker, CI/CD, Vercel, Netlify
Soft Skills: Product Thinking, Leadership, Remote Collaboration, Agile Development

EXPERIENCE

ParcelTrack — Senior Full Stack Developer (Contract, USA)

Remote | November 2025 – December 2025 | https://parceltrack.store

- Designed and delivered a full-stack logistics and dispatch SaaS platform with public shipment tracking and a secure admin dashboard.
- Implemented enterprise-grade security using Supabase PostgreSQL with Role-Based Access Control (RBAC), Row Level Security (RLS), and custom SQL triggers.
- Built real-time global shipment tracking with interactive maps and analytics dashboards to visualize route efficiency and delivery performance.
- Developed automated backend workflows for user provisioning, status propagation, and audit timelines, eliminating manual data errors.
- Delivered a premium SaaS user experience using Next.js 16, TailwindCSS v4, TypeScript, and Framer Motion.

Tech Stack: Next.js 16, TypeScript, Supabase (PostgreSQL), TailwindCSS v4, Framer Motion, Chart.js

Seamless Auto Part — Lead Full Stack Engineer

Lagos, Nigeria | January 2025 – July 2025

- Architected and built an intelligent auto-parts marketplace helping users identify genuine vehicle and industrial components.
- Developed an AI-powered recommendation and smart assistant system that increased product discovery and conversions by approximately 30%.
- Designed a real-time admin dashboard with role-based access, instant CRUD operations, and Paystack-integrated checkout.
- Migrated the platform from React to Next.js (SSR/SSG) to improve SEO, performance, and scalability, supporting 2,500+ active users.

Tech Stack: Next.js, Node.js, Express, MongoDB, TailwindCSS, JWT, Socket.IO, Paystack API

Attenda Africa — Lead Frontend Developer → CEO / Founder

Lagos, Nigeria | May 2024 – November 2025 | attenda.africa

- Led the rebuild of a geo-attendance and facial verification platform used by organizations and NYSC CDS groups.
- Migrated architecture from React + Firebase to Next.js + Supabase, improving scalability, security, and performance.
- Built Telegram-based automation for attendance, announcements, and reporting across multiple Nigerian states.
- Implemented AI-driven facial and location verification using Hugging Face models to prevent spoofing.
- Designed analytics dashboards providing attendance insights and engagement metrics.

Tech Stack: Next.js, Supabase, TailwindCSS, Chart.js, Telegram API, Hugging Face API

Afrisata Awards — Lead Full Stack Developer

Nairobi, Kenya | January 2024 – April 2024 | afrisata.com

- Designed and built a large-scale voting and awards platform celebrating excellence in African tech sales.
- Developed secure voting systems, admin portals, payment integrations, and real-time leaderboards.
- Implemented authentication, analytics, and role-based access for administrators and judges.

Tech Stack: React, Node.js, Express, MongoDB, Paystack API, TailwindCSS

Sunrise Water Park — Frontend Developer (Contract)

Abuja, Nigeria | April 2023 – June 2023 | sunrisewaterpark.com

- Built a high-performance, SEO-optimized marketing website to improve brand presence and online engagement.
- Delivered a responsive, conversion-focused UI optimized for mobile and desktop devices.

Tech Stack: Next.js, TailwindCSS, Vercel

Google Open Source Mentorship — Frontend Developer

Remote | June 2020 – September 2020

- Selected for Google Open Source Mentorship, contributing to the AdSense UI/UX team.
- Collaborated with Google engineers to build reusable components and improve dashboard performance.
- Improved application load time by 20% through rendering and bundling optimizations.

Tech Stack: React, TypeScript, Redux, Material UI, Jest, Google Cloud Platform

EDUCATION

Lagos State University (LASU) — Bachelor's Degree.
Aptech Computer Education, India — Certificate in Information Systems Management (CPISM).
